

Dear Sirs,

For and on behalf of the Highway Authority, and with regard to our network management duty, I can confirm I have reviewed the documents and application form for the V-Dub event this year.

This event, though having taken place for a number of previous years, has not previously been at this location, which is untested as an event location using this access. The Traffic Management Plan IS NOT approved, as indicated in the document, and currently, no meetings to discuss the arrangements have taken place, even though I have requested such. The TMP also contradicts itself in one part saying no traffic management other than signing will be required, while a drawing indicates traffic signals.

In principle, I have no objections to this application and believe that we can assist to make it successful, but the TMP needs to be finalised and agreed / signed off by the Highway Authority and Island Roads.

I would therefore ask that any Premises Licence be conditioned that the Traffic Management Plan be signed off six weeks prior to the event, and that this be reviewed each year of the three year licence requested and signed off each subsequent year six weeks prior to the event commencing .

Regards

Iain Thornton *I.Eng FIHE*
