

**Cabinet – Thursday, 14 February 2019**

**Written question from Cllr Andrew Garratt to the Cabinet Member for Infrastructure and Transport, Isle of Wight Council**

Can Cabinet confirm the earliest likely dates for the start and finish of the works to remodel St Mary's roundabout and junctions, and set out what plans there are to inform and engage with the public ahead of the start of works and thereafter to their completion?

## ***Response***

Officers are currently carrying out due diligence checks on the proposed improvement scheme before issuing the contract to commence works. The earliest it could commence is Autumn 2019 depending on whether these checks identify any further necessary preparation work. When the commencement date is agreed a programme of engagement can take place.
