

Committee report

Committee	HEALTH AND WELLBEING BOARD
Date	27 November 2014
Title	DELIVERY REPORT FROM HEALTHY COMMUNITIES PARTNERSHIP BOARD
Report authors:	HEAD OF PUBLIC HEALTH STRATEGY

EXECUTIVE SUMMARY

1. The delivery of the Isle of Wight Health and Wellbeing Board Strategy 2012-16 is being implemented through a four key partnership bodies, Community Safety, My Life a Full Life, Children and Young People and Health Communities. These partnership groups are accountable to the Health and Wellbeing Board for the delivery of the strategy and other important local outcomes for the island. The board has asked for periodic updates on the progress of each partnership body, their priorities and the challenges that they face. This report provides an update from Healthy Communities on key issues, work plans and achievements to date.
2. This report is the third of a cycle of delivery reports that summarise progress on a quarterly basis. The report provides an opportunity for the board to consider and reflect on the delivery activity of the Healthy Communities Partnership. The partnership membership includes representation from, Libraries, Training and Development, Children and Young People, Public Health, My Life a Full Life (Long term Conditions/Self-help), Fire, AgeukIW, Street Pastors, Ventnor Town & Parish Council, Healthwatch and social housing. Delivery reports are intended to inform the board and strengthen its awareness of actions being taken to deliver *the Isle of Wight Health and Wellbeing Strategy 2012-16*.

BACKGROUND

- 3 The board has received regular summary reports on progress and key issues from the partnerships charged with delivering the Isle of Wight Health and Wellbeing Strategy in line with the guidance from *Effective Delivery of the Health and Wellbeing Strategy 2013-16*.
- 4 It is the role of the board to ensure that the outcomes set out in the board's strategy, and the content of the *Isle of Wight Joint Strategic Needs Analysis (JSNA)*, are reviewed and changes made where needed. It was agreed by the board in June 2013 that regular reporting of delivery activity and issues will contribute to this role. Delivery reports and summaries are intended to provide the board with an

opportunity to identify the key priorities and issues facing delivery partnerships, and to promote discussion and action that will contribute to future review of both the strategy and the JSNA.

A PROGRAMME OF REPORTING

- 5 While reporting of activity is essential information for board members, the delivery partnerships are also engaged in a wide range of reporting activity for strategic and operational reasons. Collecting this information and organising it in the various formats required, places a necessary but significant burden of cost and time on lead partners. For this reason, while delivery reports to the board are intended to provide a focus for discussion and action, it is essential that the reports requested of each delivery partnership draws upon the body of reporting information already invested in by partner organisations.
- 6 At the Health and Wellbeing Board in Sept 2014, board members focused on the report of the Children's Trust. The focus for reflection by the board in the third quarter of the reporting cycle is a report summarising the activities of the Healthy Communities Board, attached as Appendix A. Healthy Communities is accountable for the delivery of the Isle of Wight's health and wellbeing objective of: *Enabling people to make healthy choices for healthy lifestyles* at the November 2014 meeting of the board.
- 7 Appendix B is a paper prepared for the Ventnor 'Our Place!' Programme outlining the support they can expect through Healthy Communities and Public Health in implementing asset based community mapping.
- 8 A number of achievements are set out that contribute to the delivery of the strategic objectives agreed for Healthy Communities on the Island. These achievements include the work with libraries and leisure services that have identified opportunities to deliver behaviour change support and promote healthy lifestyles in these settings, the work with Ventnor and Sandown on the Asset Based Community Development approach that enables negative images and assumptions about places to be challenged and through the continued development of the family platform which incorporates the wider determinates of health embedding 'making every contact count' as part of everyone's core business we can deliver consistent health promotion messaging.
- 9 A number of challenges are also noted. These include the need to address the impact of the government's deficit reduction plans and the impact of welfare reform on local residents. Other significant challenges include the implications of the Care Act and the NHS five year plan.

PARTNERSHIP ISSUES

- 10 It is acknowledged by delivery partnerships that it is important for the board to have reports on the implementation of the strategy and the wider partnership issues. It is intended that through these reports, partner organisations will have an opportunity to reflect on and discuss progress toward the objectives of the board's strategy. This will support the principal role of the board as a forum for considering and assisting action that will ensure the current and future delivery of the health and wellbeing strategy.

11 However, partnership board leads have asked that the board recognise the potential burden of extensive and detailed reporting over and above that agreed by the board in June 2013 and presented with this report. The form and value of future reporting to the board is being re-assessed in discussion with the board at a future review of the health and Wellbeing Strategy.

12 Partnership lead officers will assist board members who wish to know more about the work of each delivery partnership, its priorities and impact.

RECOMMENDATION

That the board notes the reports of the Healthy Communities partnerships and bodies charged with delivering the Health and Wellbeing Strategy 2013-2016.
