

## Isle of Wight Health and Wellbeing Board – Quarterly Update Report

<b>Corporate Theme:</b>	Public Health
<b>Lead Officers:</b>	Anita Cameron Smith
<b>Form Completed by:</b>	Anita Cameron Smith/Bryan Hurley/Sharon Kingsman
<b>Reporting Period:</b>	November 2017 to January 2018

<b>Key Decisions &amp; Activities Completed this Quarter:</b>	<b>Lead</b>
1. Public Health (PH) has varied the contract with Chamber Health to drive up health checks and target those living in the more deprived areas of the Island.	SK
2. The Joint Strategic Needs Analysis (JSNA) steering group workshop was held to develop the future model was held with stakeholders in November. Results from this workshop will be considered by the steering group to identify options and way forward.	BH
3. The PH whole school approach, now named PEACH (Partnership in education, attainment and children's health) was launched to schools at a workshop to further develop the approach on 28th November with the provider event happening on 11th December.	EB
4. The Adverse Child Experiences (ACE's) event took place (hosted by YMCA at Winchester house) on 15th November featuring the documentary film Resilience. It was agreed to hold a follow up workshop in February.	EB
5. Health Protection: monitoring of seasonal flu vaccination uptake, chair Isle of Wight Immunisation group, advise and support local stakeholders to improve flu vaccination uptake, continue to keep a watching brief of winter infections (data provided by PHE), & provision of local intelligence back to local and regional public health bodies (SRG, NHSE, PHE).	EM

<b>Decisions, Support &amp; Discussions Required of Health and Wellbeing Board</b>	<b>Lead</b>
1. We request that time is allowed at the next HWB for the consideration of a paper on the future provision of JSNA's.	BH
2.	

<b>Key Activities for the Next Quarter:</b>	<b>Lead</b>
1. Complete action plan from LGA Peer Review of Public Health, incorporate into the 2 <sup>nd</sup> draft of the Public Health Service Plan and identify all key deliverables.	BH
2. Continued development of transforming sexual health services.	CF

3. Continued development of integrated 0-19 services working collaboratively with Children's Services.	CF
4. Start to develop an agreed integrated approach (with CCG) to commissioning services for diagnosis and treatment of those with complex needs (substance misuse and mental ill health).	SK
5. Meet with Learning and Development to scope out the training offer as part of PEACH.	EB
6. Start to scope out a health impact assessment for the 15 year Island Development Plan collaboratively working with planning.	SK

	Previous	Current
1. No risks specific to the HWB have been identified at this time.		
2.		

Other Items for Information:
<p>Substance misuse - While working on a local substance misuse needs assessment to set the baseline for future procurement intentions it was noted that:</p> <ul style="list-style-type: none"> <li>In 2011-12 the Isle of Wight spent £1.7M on substance misuse treatment. During that year the Isle of Wight achieved 100 new entries into treatment, 438 people in treatment and 98 successful completions.</li> <li>In 2016/17 the Isle of Wight spent £1.387 M on substance misuse treatment. During that year the Isle of Wight achieved 250 new entries into treatment, 547 people in treatment and 149 successful completions.</li> </ul> <p>Recent Local Area Coordination (LAC) independent evaluation has found statistically significant improvements in health status, health confidence and personal wellbeing for those receiving LAC support.</p> <p>Public Health is providing specialist support and advice to the sub boards of the LCB.</p> <p>0-19 services are working closely with sexual health services to co-deliver Tier 1 training for year 10 students and teachers.</p>

0-19 service about to embark on the National Child Measurement Programme and provide enhanced support with healthy weight advice for students and families.

Flu uptake for 65 and over (67.7%), under 65 at risk (45.2%) and all pregnant women (41.1%) have now exceeded the uptake for last season, although still below the targets of 75%, 55% and 55% respectively. Uptake for pre-school children in an at-risk group has reached or exceeded the national target, except for children at risk age 2. Uptake in school age children has reached or exceed the national target, except for those in year 4. Uptake for frontline health care workers has exceeded the uptake for last season, but still falls below the national target. In general, uptake resembles patterns shown nationally.
