

## NEW Dog Control Order Suggestions

Q9 Would you like to propose a new dog control zone? If so please indicate where you would like this to be and explain why you would like the area to be included.

Comments (167) People were asked to suggest any new areas for dog control orders [to view click on arrow]

1. More poo bins needed to be placed round forests, especially in parkhurst as it is littered in there with dog poo and just 1 bin in the car park Also borthwood only seems to have 1 bin at the entrance which deters people from picking their dogs muck up.
2. Dogs should be on leads at all times around other dogs and people
3. Keats Green - dogs on lead. Rylstone gardens - dogs on lead (if not already) and Shanklin esplanade/Shanklin Sandown revetments - dogs on lead (if not already). We need dog wardens to patrol dogs on lead areas as too many dog attacks taking place on the island in general.
4. All public roads, footpaths, bridleways, and byeways.
5. Every dog should be under control and it's unfair the people with there dogs out of control making it harder for others, it's always the 1% of bad owners making it difficult for the rest of us.
6. I would like to see signs on the breakwaters on the beach so dog owners are aware
7. Along the revetment from Sandown to Shanklin. There's always people along there with dogs off leads, especially early morning and not everyone likes dogs running up to them. Also when they are not on a lead the dogs run on the beach where they are not allowed. Please do something about this. Also I suggested years ago about putting 'no dogs' signs on the groins, then when people are illegally walking their dogs on the beach, they would see the signs.
8. East Cowes Seafront in totality. It's becoming disgusting with excrement, dogs are making unsolicited contact with people trying to use the area for recreation. There should be one specific area they can use and that area clearly observed to ensure the safety of others including other dogs.
9. On lease while passing through any livestock populated fields areas

10. Carisbrooke Recreation Ground.
11. Cycle tracks. Dogs running around can be a danger to cyclists.
12. West Cowes seafront and Northwood House Park ,resudents pay for the upkeep of both from council tax
13. Ventnor park. There are many dogs chasing the ducks, budgies, children and fouling.
14. Wroxall. Dog fouling a problem
15. The graveyard next to st Thomas church in Ryde dogs on leads and no loitering
16. causeway freshwater to Yarmouth several dogs regularly allowed to crash through undergrowth & reed beds disturbing nesting birds
17. All around Lake as most owners clear up mess there are owners who don't just leaving it!
18. Over the last 18 months or so, in and around Shanklin town and including parts of the cliff path namely Eastcliff Promenade seating area, we have seen an increase in anti-social behaviour involving the consumption of alcohol. The particular individuals who habitually consume alcohol in public areas are well known and repeatedly reported to our local PCSO, PC and Hampshire Constabulary. Could I request that consideration for applying a protection order for consumption of alcohol in public space is applied to Shanklin Town or particular parts of Shanklin at the very least. These include identified areas such as: Regent Street, Shanklin – public benches on the corner of Cross Road – High Street and Regent Street. Area around the Methodist Church in Regent Street. The bus shelter (overnight sleeping often occurs here) in Landguard Road outside of the Co-op store. The public benches along Eastcliff Promenade is a favourite in the summer months for the general public and tourists but often deterred by habitual drinkers sleeping on the benches. Thank you.
19. All cliff steps such as Luccombe steps. Rylestone Gardens. Uncontrolled dogs can cause accidents on steep steps frequented by families. Rylstone Gardens are used by all ages and is a popular Music Venue.
20. Ventnor to Bonchurch revetment and all paths that form the Coastal Path
21. The childrens play area in Chillerton. This play area is controlled by Chillerton Parish Council rather than the IOW Council and should have the same protection as IOW play areas.
22. Hollow Lane, Chillerton, adjacent to village green.
23. Chillerton play area
24. Chillerton. Playground.
25. Gatcombe requires that Hunt dogs need to be controlled by a IWC order
26. Chillerton Play Area, this is an enclosed play park with a gate accessed from a bridleway. For many years the Parish Council has tried to prevent dogs using the area but faceas is regularly found by the Environment Officer. The residents would welcome this area being included in the control zone
27. The whole of Sandown bay during the summer as it is a main tourist area
28. Dog poo is unsightly our parks are like a minefield of the stuff, it just takes one dump and and someone will tread in it, no where is immune I have seen it in shop doorways, in the high street, even on the carpet of a ferry and what did the owner do, moved upstairs. There is close to my home a 200 yard long foot path with dog bins at both ends and you still find doggy gifts left behind. I have small area of grass just outside my drive I am always picking up, what am I suppose to do I am considering getting CCTV, but why should I invest £100 just to catch someone's dog crapping on my lawn. The lad from the local pub was bringing his 'husky' to foul our street, I picked up 9 between my house and the pub, I took them into the pub and put them on the bar ' these are yours' but it didn't stop, I took three or four bags back before he stopped using our street, one lady erected a sign in her garden with a picture of poo and a message, others took photos , we reported him to the dog warden, who said he would need to catch him and did nothing. It is crazy we fence in the children play area when in fact its not the children's poo that's the problem but the dogs we should be fencing off a dog poo area not the children's play area. I would like to see ONE beach, ONE park and ONE long country walk set aside for dogs, BUT I would be happy, over the moon in fact, If there was ONE beach ONE park ONE country walk

where I could go without having to share it with someone hairy hound, sniffing round my picnic, YES it really did happen a dog sniffed our picnic then peed on it, the dog owner was actually embarrassed and it nothing to improve my love of dogs

29. Path adjacent to beach through Appley Park. This is a very busy area (especially in summer) used for cycling and walking and parents with children in buggies. I have seen dogs jumping into buggies with children, running across the path from the park to the beach, knocking children over and creating a hazard for cyclists. Dogs off leads frequently run across the path onto the beach (where dogs are banned) from the park and there is nothing to prevent this.
30. Sandown/Shanklin revetment - dogs should be on leads here during the 31 May - 30 September period
31. Tennyson Trail. So non dog lovers can enjoy it without having dogs jumping up and chasing after them.
32. All public footpaths and rights of way
33. Around Ventnor park when we have problems with dogs off the lead with duckings and ducks had have enough of it put the gardeners tee in the park and duck wardens in charge on a 23!7 shift with island roads petrol
34. Bembridge Lagoons - these lagoons are protected sites; SPA,SPC and S.S.S.I. These are precious environments that are inhabited by endangered species such as the Bembridge Water Beetle and the Starlet Sea Anemone. People letting their dogs off of leads and into the lagoons is a regular occurrence in this area, as is littering with dog poo bags and dog poo. Surly the dog poo must be introducing an imbalance in this sensitive habitat to the detriment of the wildlife within it. This must be one if the most important area's to protect from disturbance and damage by dogs off of leads or leaving excrement.
35. All paths and areas adjacent to beaches that are subject to Dog Exclusion between 1st May and 30th September. See my comments at Section 6 "Dogs on Lead". All paths and areas where persistant dog fouling is a problem.
36. Location - Fishbourne Bridleway R3, the length from the junction with Fishbourne Lane to the gate giving access to Quarr Road, Binstead. Reason - the bridleway has fields on each side that are occupied throughout the year with animals (sheep, cattle, horses) and their young, that over a number of years have seen instances of harassment by uncontrolled dogs. The most extreme case was approximately one year ago with several sheep being horrifically savaged. The bridleway crosses through Quarr Abbey land, and as such, is a popular location for dog walkers (locals and visitors), who in some cases bring several uncontrolled dogs.
37. I wpuld like to see that dogs must be kept on leads in all public places
38. The surrounds of Carisbroke Castle. Children play, including rolling, on the grass banks. Even cleared faeces can transmit infections.
39. On the walk from Yarmouth to the End of the Line cafe - dogs running loose are a menace to walkers, cyclists and wildlife.
40. Carisbrooke castle grounds and car park to protect livestock in the field adjacent to the car park. 17 sheep were killed by dogs in 2019 on this land
41. Gatcombe, because we fell threatened by the numerous out of control dogs that are let out of the Hunt premises when they go walking with them. If the dogs were on leads and the owners cleared up all the faeces after the dogs, then it would be ok, but they never do.
42. Gatcombe area. When using the highway/bridleways in this area we frequently come across dogs out of control and not on leads, or worse the Isle of Wight Foxhounds, the latter are intimidating
43. Ryde beach- currently dogs are excluded from the beach during summer months however during this time they are allowed on the large sandbank at low tide. In reality owners allow their dogs off lead and dogs run all over the beach, often out of control. I would like the dog restriction to include the large sandbank in this area and it would also be great for the dog restriction to be in place during winter months when it is still nice to be wrapped up warm enjoying the beach with my children.

44. Wootton Recreation Ground - Pitches used for Rugby and Football during the season - 1st September to 30th April. Children and adults use the pitches on a regular basis and often have to remove dog faeces before playing. I have experienced children falling in dog mess, which as you know is a potential health hazard. Ocular toxocariasis. Dogs also can run onto the pitches during play, which again could be a risk.
45. Niton Recreation ground which should also be an alcohol free area as is currently the case
46. Seagrove Bay, dogs (and owners) are out of control in this area which is constantly used by families
47. Northwood Park - so many large dogs run round in an uncontrolled manner that smaller dogs can get very anxious. Owners often appear oblivious to this. I cannot take my well behaved dog on a lead there any longer.
48. NO DOGS BUT ASSISTING DOGS FOR BLIND ETC SHOULD BE ALLOWED IN ANY SHOP
49. The ability to bring in orders for roads which have persistent fouling
50. Sandown marshes and water courses and lakes along the Eastern Yar where wildlife isn't already protected from dogs.
51. All playing fields and sports pitches so have dog bans and anyone ignoring this should be fined
52. YES. On the revetment between Sandown and Shanklin as this is an exceptionally busy thoroughfare with pedestrians, cyclists, hut owners/renters, water sports activities. Dogs should be kept on a lead here from 1st May until the Autumn school term starts again.
53. Dogs should be on leads on cycle path 23 to prohibit dogs jumping up at cyclists and also to protect small children walking and cycling on said cycle path
54. There are too many already.
55. Seaview, beaches during the summer months. As a dog owner myself, it's irresponsible to allow dogs free roaming when the beaches are packed with children in the summer months.
56. There needs to be more dog waste bins please. With formal notification above these bins outlining how fines will be given if you do not clear up dog faeces. Our streets are becoming so littered with dog mess it will eventually become a hazard as dog faeces is very toxic.
57. ALL COUNCIL OWNED PLAYING FIELDS ON THE ISLE OF WIGHT
58. Ryde beaches dog control zones must be confusing, as owners seem to inadvertently take their dogs from dog friendly areas onto dog control areas. Is this because beaches don't have defined boundaries? Or the maps aren't visible from on the beach? For some reason/s the current control zones don't really work.
59. Rylestone Gardens, Shanklin, can cameras be put up to stop the constant fouling by dogs and dog owners not being responsible and picking up and a very heavy fine if caught with appropriate signage
60. Coastal path and accessible coves between Ventnor and St. Lawrence
61. Bembridge beach - especially South East side (from cafe towards Whitecliff bay) as constant pressure by dogs off leads chasing birds prevents them from feeding.
62. Birchmore lane and Blackwater cycle track. (Naturezones Nature Reserve) People do not pick up faeces along the track. They have a detrimental impact upon wildlife in the area and sheep which frequently graze along there. Dogs should be on leads in this area. Water voles in the area should be protected from dogs running loose
63. All dogs on leads at all time unless they have a night certification of training
64. Collingwood Road Shanklin
65. Along revetment between Sandown and Shanklin during school holidays as this is a shared footpath. Also cyclists should be advised to slow along this stretch... For the same reason
66. Carisbrooke Castle fields, fed up with taking the children there to run around and picnic and getting dog poo everywhere. The plastic dog poo bags hanging from the bushes is disgusting.
67. Should not be allowed In restaurants or eating premises.
68. We would like to see dogs on leads under control on Culver Down. The reason being is to stop owners from allowing dogs to roam free and not pick up, or ignore picking up.

69. The trouble with all of this is that responsible dog owners will control & clean up after their dogs. Irresponsible owners will not. Unless irresponsible dog owners are caught and prosecuted this will not alter the difficulties encountered.
70. Shanklin Apply beach, chine to Luccombe because out of control dogs , lots of fouling and full poo bags floating and left laying about.
71. Simeon Rec in Ryde. Children play here all the time, dog owners let their dogs run loose and deficate without cleaning up. On numerous occasions I have had to clean dog poo off my child who has simply been playing football. And been told by dog owners to stay away from their child wary dogs - which are off a leash in a children's play area. Given the skate area, play park and large grassy expanse, it would be nice to have a clean, safe child friendly area.
72. A flexible zone to control dogs around livestock. Most owners are responsible, as usual its the odd one or two who cause problems.
73. All beaches all year round
74. Big mead
75. Freshwater Down. Dogs often running free
76. Keep dogs under control at all locations that children are at play
77. All beaches all parks. People do not understand or unwilling to control their dogs. Should be free to walk without being rushed or threatened by a dog
78. Ventnor park. Have seen many dogs off lead running away from owners. Have seen them in the stream/pond bit chasing the ducks plenty of times.
79. All places where people eat food outdoors or sunbathe/sit on beaches or grass areas, cafes etc. Puckpool Park would be a much nicer place without dogs. Any park or recreation ground where people wish to play football but can't safely for fear of getting dog's mess on themselves or being attacked/pestered by offlead dogs. Ban the dogs completely from such areas including skateparks because nobody likes cleaning dog's mess off of their board or wheels or their bike.
80. St Helens Duver & Beach because people are not clearing up the mess from Dogs fouling everywhere.
81. This whole survey seems to be about dogs. What about unruly teenagers?
82. St Helen's Beach & Duver: 01/05-30/09 Dogs on leads in both areas. There has been an explosion of dog ownership to the point that there are very often more dogs than people in these areas now and owners walking ahead of their dogs are oblivious to what is happening behind them. Designating and advertising the area as a lead-free zone for dogs just brings in even more. I have politely asked several owners to pick up their dog poo - some don't have bags with them. I love dogs and I appreciate they play an important part in people's lives. However, when you are sitting on a beach with children and their sand activities are destroyed by an uncontrolled dog then I wish they were all put on leads. The Duver itself is losing its top vegetation with all the sharp claws on it. Is this an issue for the National Trust / local ecology? In a perfect world, if all the dog owners were responsible, there would be no issue.
83. St Helens village green & adjacent playing/cricket fields in St Helens. The green areas mentioned above are surrounded by roads, many a time I have seen a dog gone to run for a ball or been startled by something & dart towards the road. During the summer it is much worse, I feel that all dogs spots be on a lead on the village green at all times.
84. I would like to see more enforcement of the current rules. Especially dogs off lead along roads.
85. Battery gardens, lake. As a dog owner myself and a mother, I find the number of off lead dogs running out of control can be quite intimidating to children and on-road dogs using the area
86. Vectis Field, Newport. Walkway between Appley and Puckpool. Cowes seafront, the Green.
87. No there are enough restrictions on dogs, try crossing the ferry during school holidays children need some restrictions not dogs, the ferry is bedlam with children running amok
88. Ventnor Park

89. I would like at least one beach on the island to exclude dogs all year round so I can visit a beach in the winter as well as the summer without having dogs bothering me
90. The entire Isle of Wight -- there are too many dogs
91. Christ the King playing fields. There are supposed to be no dogs but now the gate has gone I regularly see people walking their dogs across there.
92. Cowes Green: this is an area that the public can sit and watch out over The Solent and is often spoilt by irresponsible dog owners letting their dogs run around off the lead and disturbing people just wanting to enjoy the atmosphere, this behaviour of dog owners is unfortunately far too common occurrence in and around the Island especially on beaches many owners have the attitude that "it doesn't mean me" or "but everybody loves dogs" that while that can be true in the right place and beaches and open public spaces should have the ability to restrict dogs so the public can enjoy the spaces without the worry of being disturbed.
93. Gurnard Green and Cowes Green. These Greens are busy with Adults and Children and some dog owners use them to exercise the dog off the lead by using a ball thrower stick and are often up to Fifty metres from the dog. On lead exercise also results in less dog mess not being picked up as is the case on both Greens.
94. In all public spaces particularly in parks, coastal paths ,country footpaths and popular beaches.
95. Path between Victoria recreation road and Wellington road. The path is used by many children and always had lots of dog mess
96. Would like to see dogs on leads on Bembridge beach - during the winter to protect migratory birds, and in the summer to safeguard children playing.
97. Would prefer dogs to be on leads around Carisbrooke Castle. There are many dogs being walked and they often jump up at passers by. Though friendly they often have very muddy feet!
98. At Helens beach should be made dog free in the summer months, it is overwhelmed by dogs because they are banned on other beaches so they come to St Helens? They cause a nuisance, poo all over the place, and are a danger to public health. I spend a lot of time there in the summer and witness many incidents of dogs pooing around the place with no owner in sight. I know the council say they do not propose to bring in a ban for dogs on the beach at St Helens this is because they do not have the guts to bring it in line with other beaches. Why ban dogs in some places and not others. ? If it is the right thing to do then all beaches should be the same. Then you should make all beaches dog friendly in the summer. One of the results of the increase in dogs at St Helens is that the dog poo bins cannot cope with the volume and often overflow, another public health issue. Ban dogs from the beach at St Helens in the summer. Have the courage to do it.
99. Please no dogs on Seagrove & Priory beaches during Summer period - ie May to Oct
100. Priory Bay. Reasons: 1) It is popular with families in the summer. 2) It is common to see dogs running round harassing the seabirds and wading birds which use this area at different times of the year. It used to be a peaceful environment for these birds but nowadays they are constantly being chased off by dogs. I think they should be given some protection.
101. St Helen's Duver beach during summer months. I walk my dog in St Helen's every day and am surprised dogs are allowed on this popular bathing beach
102. all beaches
103. How about some effective enforcement island wide?
104. Compton Beach Dogs off leads continually jumping up at children and running off with balls etc
105. Dogs should be on leads in ALL public spaces and highways.
106. All dogs should be kept on leads in public areas
107. ALL ISLAND CYCLE TRACKS - DOGS NOT ON LEADS ON CYCLE TRACKS ARE DANGEROUS. I HAVE HAD 2 ACCIDENTS DUE TO DOGS NOT ON LEADS
108. Spring hill gardens Ventnor
109. Ventnor Park where dogs, not on leads are known to attack ducks/ducklings.

110. Again, most dog owners are responsible, don't punish them, deal with the non responsible ones.
111. all public areas. Dogs should be kept on leads to prevent attacks and to ensure that owners know when their dogs are defecating and should clean up after them.
112. All beaches and public parks. Dogs are a menace to children and the infirm
113. I think dogs should be banned from all public park areas ie, Victoria Recreation Ground, Big Mead Shanklin, Appley park et al. these are areas where the general public have access at all times. Even if a responsible owner picks up after their dog, there must be some "residue" left behind, this can still be a health hazard!! In Victoria Rec. there is an unfenced slide and swings adjacent to the top of Alderbury lane, this should also come into the banning area.
114. Shanklin cliff path. Zero control of dogs there shitting everywhere.
115. Colwell Common
116. Please please please stop dogs fouling Ryde ( around Haylands Primary School !). Someones child is going to become seriously ill! Dogs should be DNA tested!
117. I think there should be these dog control areas everywhere. I like to think of my self as a responsible dog owner but what really bugs me is when dogs are not on leads and owners do not watch them and they don't see them do there business and therefore are unable to clean up the mess afterwards
118. The cliff top path between Sandown and Shanklin. There's dog mess everywhere, and the narrow path restricts the opportunity to avoid dogs that come bounding up to you and cause a nuisance. Of course, if you reject the dogs attention, the owner usually states "He's only playing". Why can't these people understand not everyone wants to kiss their dog !
119. Anywhere children are
120. A section of Appley Park should be dedicated as a children's play area.
121. Pan park. A no dogs sign isnt effective and there is dog poo in the park all the time.
122. All residential roads/closes which are unadopted by the council should be opted in.
123. All agricultural land traditionally used for livestock.
124. Keats Green / Chine Avenue, extending to Church Rd / Queens Rd / Everton lane ( associated pathways leading to Tower Gardens . During the past six years myself and many residents have witnessed anti social behavior to include drug use ( documented via Hampshire constabulary ) , groups of persons at any time of day under the influence of alcohol , lastly many , many dog walkers blissfully unaware or simply ignoring their dog fouling the footpaths and grass areas to Keats Green . The entire length of the upper cliff path through to Battery Gardens is in fact littered with dog Faeces , including all paths to the lower revetments .
125. Ventnor Park and the grass area above ventnor park
126. Recreation ground, Wootton. Used by footballers and rugby players of all ages. Ask any coach, clearing the pitch of dog mess before matches is an unpleasant but all too regular task. Local p.c will not request this because of the large dog owner vote in Wootton.
127. Any where there is live stock keep dogs on leads
128. I think around kids areas like the skate park in east cowes should not allow dogs to be roaming around when you have a child who is scared of dogs it makes it hard to go to many green areas cause there is always dogs .saying that people seem to take there dogs everywhere like Osborne house even when events on !!
129. Seaview - dog shit every few steps on all the pavements
130. Litten Park in Newport, to many youths with dogs off lead with no or little recall and by a children's play area and main road. Also dogs used to intimidate late at night
131. Brook and Compton beaches - fed up of dogs rushing up and jumping at my children. They trample over our picnics. They also go to the toilet on the beach. Disgusting.
132. ALL The Island

133. Any of the public cycle paths (I use the cowes to Newport path). Dogs off leads are a constant danger to the cyclist and the animal.
134. Along ALL shared pedestrian/cycle paths.
135. We are 100% totally in agreement with proposal of dogs having to be on leashes on St. Helens Duver! We would also like to go so far as in saying that this law should also be extended onto St. Helens beach & prom itself. We are please, please asking if Puckpool Park & Culver Downs could also be proposed as enforcement areas! The amount of times we have either trod in dog faeces or witnessed children tread in it in numerous. We have also seen the dog(s) actual owners so far away from their dog(s) that they don't even know they have defecated and obviously walk away, there are also the odd owners who know but leave it anyway. We think it's about time these two places were considered as what with children being involved it's certainly a lawsuit waiting to happen!
136. Beaches at tide line where winter birds are feeding and nesting.
137. Ryde and other beaches where wintering birds feed, as people keep letting their dogs chase the birds
138. every public walks in all Forest and keep dogs on a lead I dont use the lovely forest walks anymore because you have to walk very carefully as if in a mine field or you will tread in dogd muck also loose dogs some in a pack are threatening to people and dangerous. All dos should be kept on leads.
139. Question if all dog control orders should be to end October
140. Fort victoria golden hill freshwater fantastic location blighted by inconsiderate owners not everyone owns a dog many tourists visit this location not always with a dog .
141. The path from The Heights car park through to Los Altos Park. The path is regularly used by school children going to and from local schools and also the leisure centre. The path is in a digusting state. There is no dog waste bin, so the dog poo bags a thrown over the fence into the old reservoir. The dog poo bags remain hanging on trees and bushes for years, not only is it somewhat a unhealthy but also a disgusting sight for both visitors and and residents. This problem needs to be addressed by putting dogs on leads so they cannot roam and poo undetected by the owners. A dog poo bin put in place by the car park. Owners are reluctant to take their dogs smelly poo bags home in the car.
142. On football grounds and other places where people regularly come in contact with the turf.
143. Dogs should be on leads in all built-up areas, such as villages. I live in St Lawrence and feel free-roaming dogs to be a hazard, especially on roads.
144. Sea wall between Bonchurch and Ventnor. My mother got knocked over by an out of control dog in 2017
145. Yes in Puckpool park on the upper and lower walkways by the sea. I walk it regularly and the owners do what they want to do, and if challenged they say that they have the dog under control
146. Happy to continue to walk my dogs as widely as possible, but, as now, with courtesy to other users of areas.
147. Dogs on leads on footpaths at Appley Park and on seafront at Ryde. I understand that dogs need to run in the park (I grew up with dogs at home) but think they need to be under control when on paths near to the playground, cafe and beach etc
148. It should be island wide all livestock should be protected especially during lambing time . All farmers should be given the option to apply for restrictions to protect their livelihood
149. Culver down. St Mary's church cemetery
150. Ryde West/Binstead - Dog fouling is prevalent
151. coast path . Not nice having several dogs off their leads charging all over the path when you are out for a walk.
152. East Cowes playing fields because they are always full of dogs mess
153. I would like to see a dog control area in Victoria Rec, Carisbrooke, I often jog round this lovely rec and have on occasion been in fear of attack when a loose dog has charged at me! and on one occasion

had a nasty argument with a dog owner who claimed I 'should have stopped' running! this is simply intimidation of an innocent park user and could be prevented by keeping dogs on leads in this area.

154. Freshwater to Yarmouth footpath (the old railway line) including the Causeway Bridge. This would be really helpful to prevent dogs chasing (and in several cases last year injuring) nesting birds including the swans.
155. Cycleways, I am chased and attacked every year, last year friend knocked off bike on Sandown route by 3 large dogs and then attacked by owner for scaring dogs, he broke his hip and hat to hobble away from him for safety. The causeway in Freshwater, dogs frequently chase and attack roosting or wading birds, I used to live along the route & constantly had dogs entering my property and acting aggressively as they do when they encounter a stranger, who is startled and afraid of strange dogs
156. Appley beach between Ryde harbour and Appley Tower, in winter dogs to be kept on a lead and away from the waters edge to protect the wading birds overwintering on the sands.
157. I would like dogs to be banned from cafes and restaurants
158. All public places . I am sick of seeing dog foul wherever I walk in Ryde.
159. Yaverland Beach towards culver, dogs running up jumping up knocking children over off leads, this has happened lots of times
160. Around schools
161. All along the coastal path. Dog fouling is rampant and not policed as far as I can see.
162. Puckpool and Appley where dogs are a real nuisance. For example dog owners almost always let their dogs off leads in front to the Puckpool beach huts and allow them to run ahead then not notice or pick up the dog mess, often left on hut aprons, path or the grass play area.
163. The rest of the Island. Dogs should always be under control (on a lead) in public areas. The preference of dog owners should not be more classed by the IWC as more important than the basic right for people to feel safe in public spaces. The assumption should be that they are not under control when off a lead - rather than assuming that they are under control when not on a lead.
164. All island cycle routes as danger to cyclists---have been brought down twice by dogs off leash
165. I would like to see the return to service dogs only in restaurants n cafe licenses. I am a dog owner but I see so many owners not controlling their animals. Guernsey have a ten pound a year license. Your given a parish risk for the dog collar to show where the dog lives and if your responsible owner. Money goes towards ensuring enough dog waste bins are funded
166. Anywhere where a dog is allowed should be a dog control zone, dogs should be kept under control at all times whilst out in the public. By this I don't mean on a lead, I just mean 'under control'.
167. can you look at dogs on leads along esplanades ie shanklin small hope to sandown, ryde apply to seaview. I am a dog owner & it is very annoying having dogs loose on the walkways
